16. Monday Night Networking	177
17. Women's Equity Breakfast	166
18. Round Tables	155
19. AIAAA Bus. Mtg	104

Comments: Good to see tables and chairs at Monday Night Social; what can we do to get more AD's to remain for Tuesday's presentations? Would a re-arrangement of conference activities help? Excellent conference—too bad more ADs don't make it or leave early; Good accommodations, good speakers, would like to see more classes offered beyond the intro courses; we need to continue to have multiple levels of classes; I have two books by Tony Dungy—he would be a superb speaker at next years' conference; Tuesday's Equity Panel and Round Table discussions should have been presented on Monday prior to the main speaker—it would have benefited a larger audience—very informative and useful; LTC 612 for main class of conference in my opinion was not a good choice; I feel like there are many other areas of athletic administration training that would be more useful and beneficial to ADs; good stuff overall-golf tourney much better w/lunch and prizes, need some better leadership classes offered during Monday afternoon; would have preferred a class more related to athletics on Monday instead of LTC 612—everything else was fantastic; excellent speakers at the equity breakfast; great job Paul with the vendors; Joe Ehrmann-WOW; Monday Night BBQ nice with tables, LTC 612 should have been offered at beg and adv levels, Matt was professional but poor choice of courses; Senior level LTC classes will attract more attendees in afternoon; vendor selection very good, guest speakers all good, Prescott site is perfect, mentor parts excellent, equity guidance counselor helped me a lot; social

networking options-invite hall of fame inductees, past presidents and retired AIAAA bd members; continue with next level of classes for new ADs; very good conference-having Joe Ehrmann as a speaker is good-keep it up-very organized conference; great awards luncheon-horrible food; get a better sound system; golf better-nice job-would like to see more technology, ie, webcast AIA 368; Conference always well done and useful; This conference has always been a blessing; I wish more people in 1A came, When you did LTC 612-most small schools have Windows 2003 so it wasn't applicable; a great slide show from XCP; good website info at round table; did not attend LTC 612...possibly too basic; Joe Ehrmann outstanding; Round tables great, LTC 612 was very disappointing in that there was not a clear objective. The teacher was very knowledgeable –it was just hard to know where we were going. A better thought might have been to list some ways to use technology in our jobs and then show us how to use Power Point and word to achieve those goals. Monday was also difficult because with the LTC workshop ending early and everything following it left a void and some folks left because there was nothing to do. Also not everyone was aware that the late afternoon activities were moved up and caused confusion. Tuesday's round table would have been great on Monday—great presenters which the larger group would have greatly benefitted from hearing.
